

Culvert Replacement Policy

Culvert Installation and replacement:

Wasco County Public Works hereby adopts the following policy when installing or replacing culverts along county roads:

1. The standard cross culvert shall be no less than 18” in diameter. 2. The standard driveway, or approach, culvert shall be no less than 12” in diameter, and no less than 30’ long. 3. When conditions warrant greater than minimum pipe diameters, Wasco County Public Works shall determine the acceptable design size prior to installation.

Signed this _day of July, 1997.

Dan Boldt, Director

Jack Huskey, Road Superintendent
