Dear Planners,

About a year ago the citizens and community surrounding Sevenmile Hill joined together to oppose the installation of a wind farm that would have significantly impacted the environment and way of life of the citizens of Mosier and nearby residents. As a property owner in Mosier, I was relieved when the wind developer made the decision to not go forward with the project.

Although I am unable to attend your planning meeting tomorrow, I would like to voice my support for the petition calling for a minimum 1.5 mile setback from dwelling in and outside resource zones, and strong protection from any wind farm development within the Columbia Gorge National Scenic Area. There are plenty of other properties on remote farms far from views and populated residential areas where wind farms have and can continue to be installed. Please do whatever you can to help us protect and preserve the quality of life in the still unspoiled and precious few untouched communities within the Columbia River Gorge.

Thank you,

Nick Leitschuh
